# ChromaTech® WR

# PHOTOPOLYMER EMULSION

Use for waterbased textile printing:

- Fast Exposure
- · Excellent mesh bridging
- Sharp image quality
- Resistance to plastisol, water and discharge inks

# **MATERIALS**

REQUIRED
Exposure unit
Washout area
Clean work area
Scoop coater

# RECOMMENDED

Pressure washer

#### **CHEMICALS**

#### RECOMMENDED

Chroma/Clean™ mesh degreaser

Chroma/Strip™ screen reclaimer

Chroma/Haze™ haze remover

#### **SAFETY AND HANDLING**

ChromaTech®WR emulsion should be handled like any other direct emulsion. This material is not hazardous when used within reasonable standards of industrial hygiene and safe working practices. Refer to MSDS for further information.

# **STANDARD SIZES**

Quart, gallon

# **SPECIFICATIONS**

Appearance: Blue Solids: 45-47%

Viscosity: 10,000–17,000 CPS Other: available upon request

#### **SPECIAL INSTRUCTIONS**

Mild or screen safe chemicals are recommended to reduce potential for stencil lock-in.

#### **STORAGE**

**ChromaTech®WR** emulsion has a shelf life of 24 months at room temperature (60° to 80°F).**ChromaTech®WR** emulsion should be stored in its original container.

**Protect from freezing.** ChromaTech<sup>®</sup>WR is not freeze/ thaw stable. Freezing during shipping may result in high viscosity and may cause the emulsion to become unusable.

# ChromaTech®WR EMULSION

#### INSTRUCTIONS

#### **DEGREASE**

Using Chroma/Clean™ mesh degreaser, work up a lather on both sides of mesh. Flood screen and frame thoroughly with garden type hose, then dry.

Fill scoop coater with room temperature emulsion. Slowly apply first coat to print side. Then coat squeegee side with one to three coats depending upon thickness required. If thicker stencil is required, additional coats may be applied to print side after initial drying of stencil. Be sure to dry thoroughly between coats.

Thoroughly dry screen prior to exposure. Temperature should not exceed 110°F (43°C).

#### **EXPOSE**

Exposure tests must be performed on the ChromaTech®WR emulsion to determine proper exposure times.

#### **DEVELOP**

Gently spray both sides of screen with tepid water, wait 30 seconds then gently wash print side of the screen until image is fully open. Rinse both sides thoroughly. Dry screen completely and you are ready to print.

#### **RECLAIM**

Apply Chroma/Strip™ screen reclaimer to both sides of screen. Scrub area to be reclaimed with a stiff nylon brush to ensure entire surface is wet and let it work a few moments until stencil begins to dissolve. Remove stencil residue with pressure washer, then rinse with garden type hose, thoroughly flooding screen and frame.
