

product solution

Dynamesh DYNABOND Two-Part High Resistance Frame Adhesive

DYNABOND Two-Part High Resistance Frame Adhesive is a quick-drying two-component adhesive that features a very high shear strength and an even higher chemical solvent resistance than our standard DYNABOND Two-Part Frame Adhesive.

It creates a tight bond between the mesh and wood, aluminum, or steel frames. It is specially designed for high modulus mesh and can be used in automatic washout and reclaiming devices.

The DYNABOND Two-Part High Resistance Frame Adhesive kit includes both the adhesive and catalyst.

FEATURES

- Quick drying initial bond
- Ideal for high tension screens
- Chemical resistant
- High-vis light red color
- Shelf life of 12 months for unmixed adhesive, and 6 months for catalyst
- 60 - 90 minute pot life with catalyst at room temperature with relative humidity of 65%
- Can be thinned with 3-5% acetone if desired

PURCHASING OPTIONS

Available in

1 Gallon Can with 22.1 Ounce Catalyst

- * *Free shipping offer only valid for DYNABOND and RhinoTech adhesive products. Must be either a new customer, or an existing customer ordering adhesive products for the first time. Some additional restrictions may apply. [Contact your sales person](#) for more details and to order.*
