# Dynamesh DynaSilver™ Metalized Polyester Tape

DynaSilver is a super strong, yet only 1 mm thick, polyester screen tape. It can be used to protect frame adhesive from aggressive inks and solvents or to protect screen mesh from sharp substrate edges. Because it is so thin, DynaSilver tape can even be used close to the image.

DynaSilver tape is slit to various widths in 300 linear foot rolls, and can be die cut to your specification. Available in mirror finish.

## FEATURES

- Super strong
- Super thin
- Ink and solvent resistant

## PRODUCT OPTIONS

### Packaging

With or without backing liner

### Format

Roll or die cut

### Width

1, 1.5, 2, 2.5, 3 in
