Fimor Serilor® MACH Squeegee Holder

Serilor MACH is a squeegee holder known for superior resistance and a longer life. This line of squeegee holders reduces set up time by having squeegees and holders ready per color. They are also compatible with OEM equipment and adjust to accommodate most squeegees and machine models, including older equipment. This particular model, the bolt-in holder, was designed to be bolted directly onto the beam.

FEATURES

- No need for clamp
- Can be fixed on sides of the press
- Can be used with the same set of jaws as “straight” model
- 3 slots for drilling
