The FOTECHEM 2300 Series of adhesives is designed to quickly and reliably adhere mesh to frames made of aluminum, steel or wood. It is especially designed for high modulus mesh and can be used in automatic washout and reclaiming devices.

Each product in the series is distinguished by color and viscosity and categorized as either activator or glue. If the listed product ends in '5' then it is an activator to the adhesive which ends in '0'.

**FOTECHEM 2320** adhesive is a fast-drying mesh to frame adhesive. It cures quickly to full temperature and solvent resistance. It is compatible with the FOTECHEM 2325 catalyst at a mixing ratio of 1:5.

**FOTECHEM 2330** adhesive is a fast-drying mesh to frame adhesive. It cures in 4 hours to full temperature and solvent resistance. It has a long mixed pot life of up to 24 hours. FOTECHEM 2330 is compatible with the FOTECHEM 2335 catalyst at a 1:5 ratio.

**FEATURES**
- Excellent solvent resistance
- Drying time is approximately 2 to 3 hours

**PRODUCT OPTIONS**
- FOTECHEM 2320 products are red in color
- FOTECHEM 2330 products are clear in color

**PURCHASING OPTIONS**

**Available in**
1 Gallon, 5 Gallon, 50 Gallon sizes

*Discounts available when purchased in full cases. 1 case: 10%, 2-4 cases: 15%, 5+ cases: 20%*
