# Grünig G-PREP 320 Frame Cleaning Machine

The G-PREP 320 is a screen frame stripper that is fast, economic and efficient for all sizes of screens and profile thicknesses.

It enables a consistent grinding process that guarantees identical results from all operators. The rotating abrasive disc grinds the screen frame profiles in both directions, and the G-PREP 320 also allows for places with particularly resistant residues to be easily ground over multiple times.

## FEATURES

- Simple operation
- Suitable for all frame formats
- Straight and regular grinding
- Operation with foot pedal
- Processing length 39" or 59" (1000 or 1500 mm)

## PRODUCT OPTIONS

### Option H

Hard metal grinding disc

### Option K

Small screen support allows you to handle smaller screen frames with a profile height between 3 and 5 mm.

### Option S

The safety suction device WAP vacuums the grindings and residue that fall into the suction device during the grinding process. The particles are filtered in the dust bag and can be easily disposed of as needed.
