

product solution

Image Mate DC 565 Emulsion

DC 565 is a premium, universal, red dual cure photoemulsion intended for all extreme textile and graphic printing applications. With medium viscosity and an extremely high 46 percent solids, DC 565 yields high stencil buildup with low Rz. It offers superior resolution, wide exposure latitude and outstanding performance.

FEATURES

- Resists solvent lock-in from lacquer thinners and mineral spirits
- Excellent durability to withstand long runs
- Very easy reclaiming
- Wide exposure latitude
- Very fast dry times
- Extended unexposed screen life
