Newman Roller M3™ Series

Newman Roller M3™ Series Ultra-Light retensionable frames are well known throughout the printing industry. These light weight, yet strong, aluminum frames are designed to deliver high tension, resulting in greater accuracy and increased production.

M3 Series frames can be tensioned manually or automatically, using Newman Roller Master™ stretching machines.

M3 Series frames have a larger roller diameter than the MZX Series, and a higher maximum tension capacity of 85 Newtons. They are Newman's "automatic" frames and are 300% stronger than the MZX Series. Though the MZX Series can be used for automatic printing, the M3 Series is recommended for medium to large shops with multiple automatics and that do not want any screen tension limitations.

FEATURES

- High quality, durable construction
- Designed for automatic printing at high tension

PRODUCT OPTIONS

Model	Size
M3-UL™	23 x 31 in (58.42 x 78.74 cm)
M3-UL™	23 x 33 in (58.42 x 83.82 cm)
M3-UL™	25 x 33 in (63.50 x 83.82 cm)
M3-UL™	25 x 36 in (63.50 x 91.44 cm)
M3-UL™	26 x 36 in (66.04 x 91.44 cm)
M3-UL™	31 x 42 in (78.74 x 106.68 cm)
M3-UL™	33 x 42 in (83.82 x 106.68 cm)
M3-UL™	33 x 43 in (83.82 x 109.22 cm)
