Protec STG-80 Series Tension Meter

The STG-80 Series is a reliable, accurate and well-designed tension meter designed for use on smaller screens such as for electronic components or textiles. However, with its large measuring range, it can still be used on a wide variety of screen sizes.

The STG-80 Series is portable and lightweight, and conveniently displays in both metric and newton scales. When combined with the optional DP-1VR digital printer, it can be used to create a permanent record of all tension measurements, OK/NG test results, and even be used to create histograms.

FEATURES

- High accuracy
- Large measuring range
- Able to detect even subtle differences in tension
- STG-80D can be connected to printer

PRODUCT OPTIONS

Display

Analog (STG-80M), Digital (STG-80D)

Printing

DP-VR1 Printer Cable Available (STG-80D only)
