

RhinoClean™

PRODUCT DATA SHEET

ARP2500™ Adhesive Remover Gel

Description

- Specially formulated to remove adhesive from the frame after removing the fabric.
- Effectively softens the adhesive for removal.
- Liquid softens the adhesive, so reattachment to the frame surface is prohibited.

Directions

1. Apply ARP2500™ directly to the surface of the frame by soaking the frame, for best result.
2. Let frame soak for approx. 30 to 60 minutes.
3. Remove the softened adhesive with a putty knife.
4. If necessary, reapply the adhesive remover repeat removal instructions.

ALWAYS WEAR PROTECTIVE CLOTHING

It is the responsibility of the screen printer to test the product; review the MSDS prior to use to evaluate whether or not the product is correct for the application intended.
