# RhinoTech DG 2200C™ Degreaser Concentrate

DG 2200C is a biodegradable gel degreaser. It is a non-abrasive fabric treatment that acts like a wetting agent for use on all synthetic and wire screen mesh. DG 2200 provides an even sheeting of water for complete uniform stencil adhesion. Due to its thixotropic character, it is a very effective preparation product for large format screens held in a vertical position.

## FEATURES

- Improves film lamination and bonding of direct photo emulsions
- Use before each stencil preparation
- Can be used alone or mixed 1:50 with water

## PURCHASING OPTIONS

### Available in

1 Quart, 1 Gallon, 5 Gallon, 30 Gallon, 55 Gallon sizes
