

RhinoClean™

PRODUCT DATA SHEET

EH-A™ & EH-B™ Two Part Emulsion Hardener

Description

- A biodegradable emulsion hardener.
- Non-abrasive emulsion treatment that creates a permeate stencil once applied to the screen.
- Improves stencil durability direct photo emulsion

Directions

1. Process your screen and dry completely.
2. Mix equal parts of parts A and B in a container.
3. With a soft nylon brush or towel apply the emulsion hardener to both sides of the screen and let dry.
4. Once dry the screen is ready to use.
5. If there appears to be hardener in the open area of the screen rinse with water and let dry.

It is the responsibility of the screen printer to test the product; review the MSDS prior to use to evaluate whether or not the product is correct for the application intended.
