

RhinoClean™

PRODUCT DATA SHEET

ER8500L™ Emulsion Removing Solution

Description

- Highly concentrated, easy to dissolve, Emulsion Reclaiming Concentrate
- Designed for quick and convenient removal of emulsions and capillary films from screens
- Excellent freeze thaw characteristics
- Ideal for all climate customers
- Never precipitates out active ingredients

Directions

1. Dissolve contents of ER8500L™ into water (up to 1part concentrate to 15 parts water) to make reclaiming solutions. The more you dilute the solution the slow it will work.

Note: elevated amounts of water will slow effectiveness of product.

2. Spray and brush the solution of ER8500L™ onto both sides of stencil until stencil emulsion dissolves.
3. Rinse off with high-pressure water sprayer.

It is the responsibility of the screen printer to test the product; review the MSDS prior to use to evaluate whether or not the product is correct for the application intended.
