

product solution

RhinoTech HR 2800™ Haze Remover

HR 2800 is a thick liquid haze/ghost image remover specially formulated to remove embedded UV, conventional and plastisol inks that remain on the screen following emulsion removal. It effectively lifts the haze and embedded ink from the mesh, then emulsifies and dissolves the ink resins, binders, pigments, plasticizers, etc. The solution suspends these constituents so reattachment to the mesh surface is prohibited, thus allowing for water-rinse removal. It also removes dirt and other residue.

PURCHASING OPTIONS

Available in

1 Quart, 1 Gallon, 5 Gallon, 30 Gallon, 55 Gallon sizes
