RhinoTech RhinoClean™ Professional Series Washout Booth

The Professional Washout Booth Series is a stainless steel, chemical resistant system that effectively disposes of ink and emulsion by-products. The difference between this series and the Economy Series is that the Economy Series has plastic legs while the Professional Series has metal legs. This series is also vent ready and has a wand holder. All the booths are available in stainless steel. Custom sizes are available; call for price (which includes crating charge).
