# Shur-Loc® "EZ" Series

The Shur-Loc "E-Z" Frame system consists of both "E-Z" Frames and "E-Z" Frame Fabric Panels. Shur-Loc "E-Z" Frames are a hybrid, combining roller frame technology with the ease of use of static frames. Shur-Loc "E-Z" Frame Fabric Panels are precision cut mesh pieces with plastic connectors preattached. The shape and dimensions of each panel are engineered so that each panel achieves a specific tension when stretched using "E-Z" Frames. This enables quick stretching and delivers precise screens every time.
